

Let your users stay connected at all time

There are more than a billion people accessing the Internet from cell phones and mobile devices.

Varpi Mobile will help you to rapidly develop a mobile site that will look good on these "small screen" devices.

You will be able to give your users the ultimate experience in mobile web surfing and let them access your site at all time using their mobile devices.

Mobile site at your finger tip

Mobile site development has never been faster and easier.

You would be able to easily develop a web site using Microsoft Visual Studio (.NET) integrated development environment (IDE).

Varpi Mobile controls will make your mobile site development as easy as creating any simple Asp.NET web site.

Rapid mobile development

The development will be fast, easy and efficient with Varpi Mobile. That way you will have short time-to-market cycle.

Analysis tools

With purchasing Varpi Mobile you will get FREE Varpi Analysis to help you monitor your mobile site. For more information regarding Varpi Analysis please see <http://www.Varpi.com>.

Code once fit all

Mobile sites developed using Varpi Mobile will be optimized for thousands of mobile devices like Blackberry, iPhone, PDA, Smartphone, Nokia, Sonny Ericsson, Motorola, Samsung, LG and any other mobile device.

Develop the site one time and Varpi Mobile will make sure that it is compatible with thousands of mobile devices.

Wide variety of mobile devices

There are over 4500 mobile devices supported by Varpi Mobile.

The devices database and the customization for each device are updated regularly by Varpi team to fit new devices introduced to the market every day.

Right-To-Left Languages support

Many mobile devices has unexpected behavior when displaying right to left languages.

Varpi Mobile platform is compatible with right to left languages (Like Hebrew and Arabic) and optimizes the display right to left languages, making the development for these languages smoother and easier.

Support

When purchasing Varpi Mobile you will get access to our development forums, and knowledge base.

You will be able to contact our experts using our support system. For more advanced support plan please contact sales@Varpi.com
